RESEARCH INTEREST

I am a Ph.D. student in Electrical & Computer Engineering / Computer Science at Georgia Tech. My research interests focus on the intersection between bioinformatics, machine learning, generative AI, and signal & image analysis with broad applications to promote trustworthiness.

EDUCATION

Georgia Institute of Technology, Atlanta, GA

Aug 2021 – May 2025

Ph.D. Electrical & Computer Engineering, GPA 3.92/4.0

Minor: Computer Science

Relevant Courses: Machine Learning, Statistical Machine Learning, Computer Vision, Advanced Programming Technique, Data Visualization & Analysis, Online Decision Making, Advanced Digital Signal Processing, Medical Image Processing, Biomed-AI, and Health Informatics, Convex Optimization, Mathematical Foundation in Machine Learning.

Air Force Institute of Technology, Kaduna, Nigeria

Sept 2013 – July 2018

Bachelor's degree in electrical Electronics Engineering, GPA 3.93/4.0

Award: *Best Graduating Student*

SKILLS

- Programming: Python, HTML, C++, MATLAB.
- Database: SQL, Tableau, Spark, AWS.
- Framework / Libraries: Matplotlib, TensorFlow, Keras, Skicit-Learn, Panda, NumPy, PyTorch, OpenCV.

RESEARCH EXPERIENCE

Graduate Research Assistant

Aug 2022 – Present

MIBLAB, Georgia Institute of Technology

- Collaborate with Shriner Hospital to develop a predictive model for patient-reported outcomes after spinal deformity surgery.
- Implement a machine learning algorithm using the preoperative radiographic and SRS 22-R questionnaire to predict patients' post-surgical outcomes effectively.
- Provided a feasible machine-learning solution to various medical-related problems.
- Currently leading a team in designing a multimodal algorithm for predicting Obstructive Sleep Apnea and surgical operation outcome results.

WORK EXPERIENCE

Hamoye Technologies, Nigeria

July 2020 – Mar. 2021

Data Scientist Remote Intern

- Assisted in data wrangling and exploratory data analysis.
- Designed data modeling processes to create algorithms and predictive models and perform custom analysis.
- Provided a feasible machine-learning solution to various problems.

PROJECT

Event-Based Sensing for Drones

Summer 2022

- Modified the AirSim Drone Racing Lab environment to accommodate dynamic obstacles.
- Implemented an effective algorithm to avoid these dynamic obstacles.

Quantitative Diagnoses of Psychiatric Disorders Using EEG Signals

Summer 2022

- ❖ Implemented a multi-class classification algorithm for different psychiatric disorders using electroencephalography (EEG) signals.

Link: <https://wizaaard.github.io/SM2022-CS7641-Project/>

Event-Based Hand Gesture Recognition

Spring 2022

- Adapted concept from Large Minibatch SGD: Training ImageNet to develop an algorithm (StackResNet) to recognize motion maps extracted from various hand gesture data.

Identifying Parkinson's Disease Patients

Spring 2022

- Implemented a 1-dimensional Convolutional Neural Network model with an Early stopping monitor to predict the possibility of patients having Parkinson's disease.

AWARD

NSF Travel Award 2023

- Awarded the NSF travel award to attend the IEEE-BHI conference in Pittsburgh, USA

NSF Fellowship 2023

- Awarded the NSF Fellowship to attend the International Bio-X Summer School in Greece

Link: <http://2023.biocomplexitysummerschool.org/participants.html>

Cadence Design System 2022

- Black Students in Technology Scholarship.

Link: https://www.credly.com/badges/cd842f4f-fe16-456d-84f2-693ed376210b/linked_in?t=rmctdf

Georgia Tech ECE Fellowship 2021

- Awarded the Competitive Electrical & Computer Engineering departmental fellowship.

Erasmus-Mundus Scholarship Awardee 2021

- Awarded a full scholarship for the Medical Imaging and Application (MAIA) Program in Spain, France, and Italy after being ranked 8th (with a score of 6.8436 over 7 points) out of 535 applicants.

Data Science Open-Source Award

Hamoye Technologies, Nigeria

- Developed a Machine Learning Model to predict the Death Event due to Heart Failure & medical profile.

Link: <https://medium.com/hamoye-blogs/heart-failure-prediction-271be48c97b4>

COMMUNITY ENGAGEMENT/LEADERSHIP EXPERIENCE

President / Georgia Tech Graduate Senate

May 2022 - Present

Georgia Tech African Graduate Students Connect (AGSC)

- Plan and execute virtual and in-person events to assist the African community present at Georgia Tech. These events increased the engagement of the African community by 12%.

Volunteer

Oct 2018 – Oct 2019

National Youth Service Corps (NYSC) / Environmental Sanitation and Beautification Group (ESBG)

- Participated in the environmental sanitation and beautification of my community through sensitization programs and projects. This is part of a one-year National Youth Service Corps (NYSC) program for college graduates and was implemented after the civil war to facilitate national unity. College graduates participating in the NYSC program are sent to localities they have not been to before to work and render aid.
